

Placas de Terminação Personalizadas Série D5000/D6000

Honeywell SM e SM-SC

Estas Placas de Terminação, com (TBE) ou sem invólucro metálico (TB), fornecem conexão direta entre a Placa de E/S do sistema e os módulos da Série D5000 / D6000, que fazem interface com o campo. A proteção Intrinsecamente Segura e o isolamento de sinal entre a área segura e a área perigosa são fornecidos pelo Equipamento Associado da Série D5000. A Fonte de Alimentação de 24 Vcc da TB é conectada a dois blocos de terminais plug-in para reforçar a redundância. Fontes de alimentação fora da faixa e falha cumulativa do módulo podem ser monitoradas através de um contato específico. Os módulos são fornecidos via barramento de alimentação da Placa de Terminação. Os TB são fornecidos com um kit de montagem universal para parede e trilho DIN, enquanto os TBE podem ser montados em trilho DIN com cliques de plástico ou metal, dependendo do acessório escolhido.

Honeywell Safety Manager SC (E/S do chassi e RUSIO)
